Group members and contribution

1. Connor (Github: connorspagnuolo/ Discord: GlitchBot)
Main Program.The central planning.
Connor planned the entire project and did all the work related to the code.
Praise The GlitchBot ! (Still from Lin Guan)

2. Lin Guan(Github: Solidus1994/Discord: Lin Guan(EST,中文/English/日本語））
The main Landscaping?
Lin did all the work related to the model under Connor's command and completed the document you are looking at now.

3. Special Thanks: Sarah Vollmer
Our dear professor has provided essential technical support.

Project Overview

In the last two years, we have been forced apart by the epidemic. On every lonely day, maybe it would be better to have someone who can accompany you? Even if they are not real. So, we added some NPCs to the game of life with "you" as the main character. We used AR technology to showcase some models and added an interactive system that allows them to communicate with the user via text. We want this program to communicate like an NPC in an RPG game with the user.
